CES 2015 Show Invitation

We will be exhibiting at the CES 2015 in Las Vegas for high-performance audio. We look forward to seeing you there and welcome your feedback.

Exhibitor Name: Etani Electronics Co., Ltd.

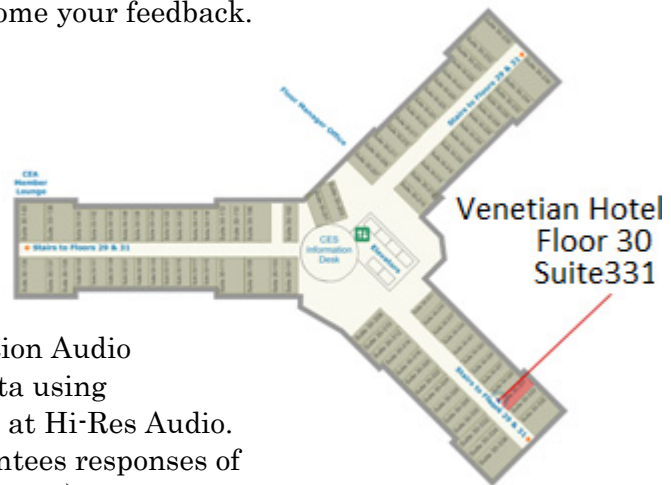

Period & Place:

Tuesday, 6 ~ Friday, 9 January

High-Performance Audio

The Venetian Tower Exhibit Suites

on Floor 30 in Suite 331

We will demonstrate the proven High-Resolution Audio on the basis of sound and actual measured data using our new product, "ETANI System One" aimed at Hi-Res Audio. It is a super-low distortion system that guarantees responses of 20Hz ~ 88kHz (20Hz ~ 100kHz with speaker alone).

The system consists of:

- DSP unit
- Power amplifier with circuit that compensates for the power loss in speaker cables.
- 4 way speakers: Original model with good characteristics.

Capable of tuning sound reproduction fields with measurement and DSP techniques.

Allows sound field corrections with before and after effects as well as to your preference.

You can enjoy listening while switching to different sounds.

In addition, our extensive measurement techniques will be explained.
